

TO WHOM IT MAY CONCERN

Developing Inclusive and Creative Economies (DICE) programme team of the British Council commissioned Centangle Interactive to develop a custom-built learning and development portal (LMS) for its project. The features of the portal included:

- SMS and email connected messaging
- Hosting of video content
- Embedded Zoom
- Chat and community sharing features
- Embedded links to further reading and surveys
- Download management
- Admin and access control
- Information and privacy control mechanism
- Monitoring and reporting mechanism

During our work with Centangle Interactive, we have found their team to be extremely professional, technically sound and client focused. They created the LMS in exceptional circumstances of COVID-19 and during a very short time, meeting all deadlines and accommodating all features requested by our team. We recommend working with Centangle Interactive and look forward to working with them in the future. We wish them success in their endeavours.
