Flat 7, Block C-12,  
Street 97,  
G-11/3,  
Islamabad.

### Profile

Adaptable and responsible computer science professional with 8+ years of experience building successful software products for clients in various industries. Proficient in PHP (Frameworks and CMS), JavaScript (ReactJs, NodeJs), SQL, MongoDB, and HTML/CSS.

### Experience

#### Chief Product Officer, Centangle Interactive ( June 2018 - Present )

As the Chief Product Officer at Centangle Interactive since June 2018, I have demonstrated a track record of success in delivering innovative products. My key achievements include:

- Leading the development and launch of 5 successful joint venture products including Financial Management System (used in over 70 Organizations), Lab Management System (used in over 10 locations), School Management System (used in over 3 school chains), Attendance System (used in more than 5 locations), and Inventory Management System.
- Spearheading staff training programs for PHP and React JS development, resulting in a highly skilled team capable of delivering cutting-edge solutions to our clients.
- Successful implementation of on-premise Git version control, and CI/CD, which improved our development process by more than 50% and helped us deliver high-quality products within tight deadlines.
- Successful Implementation of scrum based agile software development using open project, deployed on campus that facilitated the company to take data based costing decisions and improved the delivery time of projects.
- Procurement, maintenance and virtualization of of 6 servers for medium to large-scale in-house projects developed for our clients.
- Security and maintenance of Linux and Windows based servers.

My passion for product innovation and extensive experience in leading cross-functional teams make me a valuable asset to any organization seeking to drive growth through innovation and technology.

---

## Head of Services, Centangle Interactive (Jan 2014 to June 2018)

- Spearheaded team building and led successful product development for diverse clients, including investment banks, and co-operative societies.
- Delivered more than 150 small to medium sized projects using Wordpress, PHP, NodeJS and React. The projects also include a number of MIS to well reputed organizations.
- Development, Deployment and Training of Inventory Management System and Mobile App using Yii2 and React for Shipping company based in Dubai with offices at 5 locations in USA.
- Delivered multiple projects in search engine optimization (SEO), social media marketing (SMM), and digital content creation for high-profile organizations such as Akdn and Helpage International.
- Facilitated seamless transition to advanced financial systems from manual bookkeeping for various organizations.
