DESIGN LEAD

## EXPERIENCE

### Mar '18 - Present **Design Lead**

#### *Centangle Interactive*

In the brief period spent in Centangle I have worked in different capacity with big stature organizations like The Worldbank, USAID, British Council & USIP. Below is brief description of my major work:

- Directing the entire design team by defining process, principles, vision and mission in addition to day-to-day mentoring
- Developing design briefs by gathering information and data to clarify design issues
- Designing UI/UX of both web and mobile applications, shaping client's culture, vision and needs into a digital product.
- Work closely with the Product Development team throughout the development process to ensure the highest level of quality and integrity.
- Using Bit Bucket for Source Code Control, project related document sharing and team collaboration.
- Developing After Effects Animations and converting them to Lottie, to be integrated in different websites.
- Developing cross platform mobile applications using XAMARIN Forms.

### Nov '17 - Present **Frontend Developer & Art Director**

#### *Matchrakh*

Matchrakh is a sports based application designed to provide platform for teams and individuals to schedule matches and sport events. My responsibility in this project is to design and develop the mobile application for both Android and iOS. Major tasks include:

- Designing entire UI/UX for mobile app on Adobe XD.
- Developing front end of the cross platform app using Xamarin Forms.
- Wiring up all service calls to and from restful services.
- Utilizing Skia Graphics to make graphical rating system and dynamic vector shapes.
- Developing the overall design strategy in collaboration with branding and identity design team.
- Changing back-end of the app as per design requirements.

## OBJECTIVES

Product designer and developer with over 9 years of experience in IT management and software development, seeking to use proven product design and problem solving skills in an organization that will allow me to develop knowledge & potential.

## SUMMARY

- Involved in full life cycle development of software, from initial requirement gathering, to design, coding, testing and implementation of product.
- Designed and developed multiple cross platform mobile applications using tools like Xamarin Forms and Adobe XD.
- Developed management, networking and wireless network design skills during a five year career in Network Design and RF Networks.
- Skilled in research problem solving; detail oriented with an uncompromising work ethic.

# HADI MUSTAFA

.NET DEVELOPER

## SKILLS

### Tools & Frameworks

.Net framework, Entity Framework, SQL Server 2014, Xamarin Forms, Skia Sharp, Xamarin Maps, Visual Studio 2017, Git, WordPress

### Languages

C#, LINQ, HTML, CSS, Bootstrap, AJAX, JSON, jQuery, XAML

### Design

Adobe XD, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, Adobe InDesign, MS Office (Excel, Word, Power

## EDUCATION

### MS Computer Engineering

2010 - 2012

Center for Advanced Studies in Engineering, Islamabad

### BS Electrical (Telecom) Engineering

2005 - 2009

COMSATS Institute of Information Technology, Islamabad

## EXPERIENCE CONTINUED

Aug '13 - Feb '17

### Radio Frequency Design Engineer

*Lightbridge Communications Corporation - KSA*

Worked on different Ericsson Small Cells and Huawei Macro Cells projects as RF Design Engineer for approximately four years. Highlight of the four years is below:

- Planned GSM, UMTS and LTE parameters for Huawei Macro Sites all over KSA.
- Planned and designed over 300 Ericson Small Cell Sites in Riyadh and Jeddah.
- Audited entire Huawei footprint of STC KSA network to verify if the scope is implemented as designed.
- Held meetings with STC and end client to explain different products & solutions for a given scenario.
- Reviewed initial survey reports and coordinated with civil, acquisition & transmission department to expedite end to end delivery of project.

Nov '12 - Aug '13

### Technical Associate

*National War Gaming Center*

Administered LAN of whole NDU, comprising of five different domains managed through twenty servers and eleven switches. Major tasks include:

- Coordinate in designing network managing the security of entire LAN; and also participate in support capacity planning and the development of long-term strategic goals for systems and software in conjunction with end-users and department managers.
- Design the backup policies and implement the backup system and perform and test routine system backups and restores.
- Configure and manage DNS and DHCP Servers.
- Management and Administration of Active Directory, Domain Controllers, TCP/IP, Security.
- Managing the 3 com and Allied Telesyn Switches.

May '11 - May '12

### Network Management Intern

*Electronic Government Directorate*

Was part of a four-member team which supervised construction and development of a 3-tier federal government data center.
