PROJECTS

1) Sajil

Sajil is a complete Erp system that has been developed by keeping in mind the Internationally accepted conventions and practices. The system can work offline as well as online. Multiple branches can run simulataneously independent of each other and the can sync their data to see the consolidated report of overall organization. The syste currently cover the following modules

- Financial Management System
- Financial Institution Management System (for V/WOs & Cooperative Societies)
- Human Resource Management System
- School Management Systems

2) The Repair Guy :

The repair guy is built on .net framework using MVC. It's similar to free lancing sites like upwork. People posts jobs related to repairing while on the other side repair guys apply for job. Once the job is done online payments are transferred using Stripe (Payment Gateway).

3) Shopober :

Shopober is a complete Point of Sales system (POS) that has been especially developed keeping in mind the conventions and practices of the Pakistani retail industry. The system comes with optional hardware from our partner companies. Shopober completely automates your sales system and saves your and your customer's time.

4) Tideo :

Tideo is a video conferencing and contextualized chat solution for enterprise businesses. The software runs on desktop platform. It is compatible with Windows operating systems. Tideo operates within a secured intranet hence allowing confidential communication within the organization. The software comes with a number of basic functionalities like audio chat, video chat and text chat. The user friendly interface of Tideo puts every major functionality at the right place.
