80%	80%	80%	80%	60%

Work Experience

64 Months — Jan 2018 - Present

Lead .Net Developer / Dot Net Developer
Centangle Interactive

- Used ASP.NETCORE , ASP.NET, C#, and JavaScript to design and develop new sites and web-based solutions, both front end and back end.
- Designed ASP.NET application for linkage to SQL, Mongo & Postgress databases.
- Trouble-shot and fixed any threads and bugs.
- Communicated with clients to provide knowledge, expertise, and support, ensuring that their requirements were fully met.
- Increased client satisfaction.
- Updated and managed existing products and provided beneficial technical support to clients and colleagues.
- Analyzed development process and made recommendations for streamlining and alternative approaches.
- Worked on the improvement of all programming procedures in order to make the whole software development process more effective.
- Performed other duties as assigned.

2 Months — May 2017 - Jul 2017

Intern
PTCL

I was assigned to make a web portal for Task Management using ASP.NET MVC, which was supposed to manage teams, projects & their relative Tasks.

Projects

Jul 2021 - Nov 2021

White Oak
Centangle Interactive

Tools: Visual Studio 2019, Microsoft SMSS, Nuget, Github, Open Project, Swagger

This project was developed for White Oak, who provide services for maintainance checkups. It is a simple system which allows them to keep track of their tasks and Supervisors, whome the tasks are assigned. Each task contains a questionnaire, which the supervisor has to fill in along with attachments and issues. A backend dashboard was developed along with an API for mobile application.

Projects

DICE Discussion
Centangle Interactive

Jan 2021 - Mar 2021

Tools: Visual Studio 2019, Microsoft SMSS, Nuget, BitBucket, Trello, Docker, Swagger

This was a microservice which provided a forum for discussion to all the users. Users can create a post and other users can react, comment or report the shared post. User can also create polls for other users to comment on. Users can also subscribe to any topic and receive latest posts and polls related to the subscribed posts.

Pipe Math
Centangle Interactive

Jan 2020 - Jul 2021

pipemath.com

Tools: Visual Studio 2019, Microsoft SSMS 2018, Nuget, FileZilla, Gitlab, Toggl.

PipeMath Inc. is incorporated in Alberta, Canada in 2017. It is developed to bring accuracy and efficiency in performing engineering calculations and analysis. Due to research-oriented culture cultivated in the organization, to elevate the engineering skills around the globe by sharing knowledge and following up-to-date design practices in the industry driven by research and development.

Lab Management System - Centangle Interactive

Tools: Visual Studio 2017, Microsoft SMSS, Nuget, BitBucket, Trello.

A management system was required by Abdul Sattar Labs, to manage their patients, tests, test reports, panels and payments across tests. A login protected system was required which would have allowed different users to add, verify and validate a test result. This system is designed as a SASS based application. An accounting section was also incorporated to manage invoices, payments, cash and pending payments. Extensive reporting was provided for Lab Tests, Lab Reports, Tests etc. Email and SMS were integrated to notify on user creation, test creation and test report.

All in One - Centangle Interactive

Tools: Visual Studio 2017, Microsoft SMSS, Nuget, BitBucket.

A management system was required by a foreign client for their salon, to manage their clients, stylists across different branches. System was supposed to keep schedule of stylists, their attendance and availability. A client was supposed to register and login and book an appointment by checking availability of their selected stylist. Multiple treatments were required to start at one time. Invoice and wallet were also included in the requirement. A utility was also required to import clients using an excel file.

Helpage MIS - Centangle Interactive

Tools: Visual Studio 2017, Microsoft SMSS, Nuget.

A MIS was required by Helpage, to manage their projects and beneficiaries in different parts of the country. They required a system that could provide them a report of the number of beneficiaries across projects, genders, thematic areas, services and disabilities. A login protected system was required which would have allowed different users to add, verify and validate a beneficiary. A utility was also required to import beneficiaries using an excel file. Extensive reporting was required across multiple parameters.

Attendance System - Centangle Interactive

Tools: Visual Studio 2017, Microsoft SMSS, Nuget.

An attendance system was required by CIS Islamabad, to manage attendances of all their employees, working in different countrywide branches. System included taking attendances using a biometric fingerprint scanner. This system was also required to manage all the kinds of leaves provided by CIS. Multiple reports for Attendance and Leaves were also part of the system.
System also allowed Administrator to import multiple users using an Excel file.
